PROFESSIONAL SUMMARY

Systems Engineer with 20+ years of experience across software development, architecture, data and artificial intelligence. Currently working as an AI SDLC Engineer at MINDATA, driving the integration of Generative AI throughout the Software Development Life Cycle with a focus on productivity, quality, traceability, adoption and continuous improvement.

Combines AI-assisted SDLC, Context Engineering, agentic systems, engineering metrics and AI governance with a strong Full-Stack background in React/Next.js, TypeScript, Node.js, Python/FastAPI, PostgreSQL/Supabase, Docker and SaaS architecture. Founder & CEO of Dragon Pyramid, leading AI-enabled products, automation and scalable software initiatives.

AI SDLC & ENGINEERING FOCUS

- Design and evolution of AI-assisted SDLC practices for analysis, development, testing, documentation and maintenance.
- Context Engineering strategies across prompts, agents, Skills, memory and reusable engineering knowledge.
- Definition of productivity, effort, quality, adoption, cost and return KPIs with formulas, sources, populations and traceability.
- AI governance, responsible usage, model/session/token/cost analysis, technical enablement and cross-team adoption.

TECHNICAL SKILLS

AI Engineering: Generative AI, AI-assisted SDLC, Context Engineering, AI Agents / Agentic Systems, RAG, embeddings, vector retrieval, prompt and Skill design, memory and knowledge reuse, AI governance

Engineering Intelligence: Jira, Worklogs, SonarQube, KPI design, metric contracts, productivity/quality/adoption/cost measurement, comparative analysis, analytics and dashboards

Frontend: React, Next.js, TypeScript, JavaScript, Tailwind CSS, Shadcn UI, responsive dashboards, admin panels, component-based architecture

Backend: Python, FastAPI, Node.js, NestJS, Express, REST APIs, authentication, service-oriented architecture, business logic implementation

Databases: PostgreSQL, Supabase, pgvector, SQL Server, MySQL, MongoDB, SQL functions, stored procedures, data modeling, migrations

Cloud & DevOps: Docker, Git, GitHub, GitHub Actions, Render, Vercel, Supabase, environment variables, CI/CD workflows

Leadership: Technical leadership, Scrum/Kanban, documentation, stakeholder communication, mentoring, knowledge transfer and roadmap execution

PROFESSIONAL EXPERIENCE

AI SDLC Engineer | MINDATA | Aug 2026 - Present | Remote / Spain

- Drive the adoption of Generative AI throughout the SDLC, focusing on productivity, quality, traceability, adoption and continuous improvement.
- Design and evolve AI-assisted SDLC methodologies for analysis, development, testing, documentation and maintenance; define Context Engineering strategies using prompts, agents, Skills, memory and knowledge reuse.
- Define KPI and metric contracts for productivity, effort, quality, adoption, cost and return, including formulas, sources, populations and traceability.
- Integrate and analyze signals from Jira, Worklogs, SonarQube, AI platforms and Analytics; compare AI-assisted and non-assisted processes while preserving comparability and experimental quality.
- Evaluate model consumption, sessions, tokens, costs and usage patterns; collaborate with Data & Analytics on automated metrics and dashboards, and define governance, security, quality and responsible-AI criteria.

Python Backend Developer | RAG & AI Systems | Eduassistant | 2026 | Remote

- Contributed to RAG-LIA, a conversational AI backend designed to support students at risk of academic dropout through intelligent assistance workflows.
- Developed backend services with Python, FastAPI, Docker, PostgreSQL, pgvector, SQLAlchemy and Alembic, including API foundations, migrations and modular service structure.
- Worked on embedding-generation workflows, vector storage foundations and integration-ready RAG architecture for connection with an external Laravel application.

Technical Team Leader - Back Office | LUUI | 2026 | Remote / Ecuador | HealthTech

- Led the Back Office front for a HealthTech platform focused on coordinated care for older adults and operational traceability.
- Coordinated administrative-panel architecture, professional validation, care monitoring, reports, support and payment-related processes.
- Contributed to frontend/backend/database alignment, API integration, data-model consolidation, technical documentation and delivery review.

Founder & CEO | Dragon Pyramid | Mar 2020 - Present | Argentina | SaaS, AI & IT Solutions

- Define company vision, product strategy and technical execution for AI, SaaS, automation, analytics and digital-transformation solutions.
- Lead GYM MASTER, a multi-tenant SaaS platform for gym management with dashboards, member workflows, analytics and AI-driven modules.
- Coordinate multidisciplinary contributors using Scrum/Kanban, task planning, mentoring, documentation and technical review.

Full-Stack Developer | AED Digital | Apr 2025 - Aug 2025 | Remote / Peru

- Developed a billing and logistics PWA with Next.js 14, TypeScript, Tailwind CSS, Shadcn UI, Supabase/PostgreSQL, Auth and Storage.
- Built offline-first functionality with IndexedDB and automatic synchronization to maintain sales operations in low-connectivity environments.

Systems Analyst, DBA, Programmer & Project Lead | Honorable Legislature of Tucuman | Nov 2010 - Mar 2020 | Tucuman, Argentina

- Designed and maintained enterprise administrative systems, led multidisciplinary delivery and administered PostgreSQL, SQL Server and MySQL environments with focus on reliability, integrity and performance.

SELECTED PROJECTS

RAG-LIA / Eduassistant: AI-powered conversational backend for academic support and dropout-risk assistance. Python, FastAPI, PostgreSQL, pgvector, SQLAlchemy, Alembic and Docker; RAG-oriented architecture, embeddings, vector retrieval foundations and external application integration.

GYM MASTER SaaS: Multi-tenant SaaS platform for gym management with admin dashboards, member management, attendance, billing workflows, business analytics and AI-driven modules. Next.js, React, TypeScript, Supabase/PostgreSQL and Tailwind CSS.

LUUI Back Office: HealthTech administrative platform for professional validation, operational monitoring, care tracking, reports, support workflows and administrative traceability. Technical planning, API integration, database alignment, dashboard architecture and team coordination.

Retail ERP / Logistics PWA: Offline-first billing and logistics system using Next.js, TypeScript, Supabase, PostgreSQL, Tailwind CSS, Shadcn UI and IndexedDB, with automatic synchronization and installable PWA behavior.

80s Forever Digital Platform: Web platform and content-management workflow for a media/streaming brand, including blog publishing, bilingual content, Cloudinary media management and admin-oriented improvements.

EDUCATION

- Systems Engineer - Universidad Tecnologica Nacional (UTN)
- Diploma in Cybercrime & Digital Forensics - Universidad Tecnologica Nacional (UTN), 2021
- Full Stack Web Developer - Henry Bootcamp, 2024 - 2025
- Professor in Computer Science - Universidad Nacional de Catamarca, 2017 - 2018
- Intensive English Courses - Stratford Instituto Cultural de Lengua Inglesa, 2022 - 2023

CERTIFICATIONS & CONTINUOUS LEARNING

- Venture Finance / Introduction to Startup Finance - SaaS
- Business English, Part 2
- Power BI - Data-driven decision making
- SEO and Content Marketing
- Digital Marketing for Sales Growth

LANGUAGES

Spanish - Native | English - Professional working proficiency / B2-oriented continuous improvement
